

Fitting Instructions

- First job is to find cable adjusters, by right hand foot-peg above heel plate.
- Undo adjusters to make cables slack.
- Loosen cable clamps under the rear swing arm to free cables
- Remove two allen key bolts on cover of exhaust silencer to expose cables to remove from exhaust
- Trace them back to under seat (later models) or left side panel then remove carefully – WARNING: Do not turn/force as sensor is fitted to shaft, if cables slack should easily release cables from servo.
- Leave servo in place, do not disconnect.
- Loosen exhaust clamps on the link pipes
- Undo bolt securing to footpeg hanger, remove OEM exhausts
- Loose fit our link pipe connected to can on the rubber mounted hanging bracket supplied
- Adjust angles – allowing for clearance of the swing arm
- Tighten bracket and clamps

Applicable for Kawasaki Z750 (07+) Z1000 (10+) Z800 (All)
